

## PREMIUM QUALITY ACOUSTIC UNDERLAYMENT

Acoustic solutions

### Superior Noise Reduction (IIC 70 RATING)

SONOTECH high-density urethane foam construction has thousands of tiny sound pockets that cushion the floor and deaden noises, for better acoustic result.

### Ultimate Moisture Control

SONOTECH is made with high density urethane foam and provides the best moisture protection in the industry. (Vapour barrier)

### Prevents Mold & Mildew

SONOTECH contains Fresh-N-Guard™, an anti-microbial additive that prohibits the growth of fungus, molds, mildew and harmful bacteria.

### Performance

SONOTECH is manufactured of high density urethane foam to offer a superior underlayment for use with laminate and other wood flooring products. Its high-density construction ensures the ultimate in noise reduction and moisture control.

### Radiant Heating System

SONOTECH is compatible with radiant heated floor and it will also provide insulation, adding R-value to the floor.

### Easy & Fast Installation

SONOTECH features a non-skid surface that will prevent movement during installation, also the 3" vapour barrier overlap ensures 100% humidity control.

### Warranty

SONOTECH will remain resilient and moisture resistant for the lifetime of the laminate floating floor under normal use and conditions.
